

VACUUM PUMP AND PUMPSET MANIFOLDS

These manifolds are made to distribute the vacuum generated by the pumps and pumpsets to several services. They are composed of a varnished steel tubular onto which the interception valves and the connections to the vacuum level reading and control devices are installed. The manifolds described in these pages are standard. Upon request, they can be supplied with different shapes and sizes.

Art.	A	B	C	G	L	M	R	Manual valve E	Manual valve F	Sleeve	Weight
